Iris Global Services, India's Premier IT distributor has signed a Distribution Agreement with Acuva Technologie. Acuva works in UV-C LED Technology and specialises in disinfection solutions for water, surface and air applications.

Iris Global has partnered with Acuva for Pan-India distribution and enterprise business.

The Acuva Solarix is a compact hand-held device that instantly disinfects SARS-like viruses including Covid-19 within 10 Seconds. It comes with a replacement warranty. This device is used for disinfection by using UV-C LED light that eliminates bacteria and viruses on contaminated surfaces. It disinfects common high touch surfaces that collect or breed harmful contaminants. It opens up to 270 degrees and can disinfection hard to reach contour areas. Its double click switch makes it easy to operate.

This device has been designed with safety features like auto shut, safety lock and heat sink. Acuva Solarix is already being sold in Canada, the US and European markets and is now available in India through Iris Global.

"Acuva is committed to providing world-class disinfection products to its customers for their relevant usage in ongoing times. With a strategic partnership with Iris Global, we expect to reach out large customer base and fulfill their surface disinfection requirements in a chemical-free manner," said Sachin Goel, MD, India & South-East Asia, Acuva Technologies.

Sanjiv Krishen

"These times are very critical. Iris Global is proud to join hands with Acuva and market Solarix, their portable disinfection device, said Sanjiv Krishen, Founder and Chairman of Iris Global. "The Acuva Solarix is user-friendly product and of immediate use for any Enterprise. Its performance makes it a necessary health protection device in today's time.

It will help India getting its people back to work" he concluded.

Acuva Solarix is useful for Business Professionals, travelers and for use in public places like lounges, restaurants and homes. Iris Global is targeting corporate customers and eyes a Rs 10-crore business in this financial year.

Iris Global has recently diversified into the distribution of medical and healthcare products seeing the aggravating Corona situation in the country. Intending to aid this rapid rise in demands of healthcare products, with their mastered skills in logistics, Iris Global has commenced offering health care products. It is adding into its portfolio products of immediate use and high demands.
