TAIWAN EXPO in INDIA

Schedule Online 1-on-1 Meetings with Taiwanese Exhibitors NOW!

Acuva Solarix is used for disinfection by using UV-C LED light that eliminates bacteria and viruses on contaminated surfaces. It disinfects common high touch surfaces that collect or breed harmful contaminants. It opens up to 270 degrees and can disinfection hard to reach contour areas. Its double click switch makes it easy to operate.

Acuva Solarix has been designed with world-class quality and safety features like Auto Shut, Safety Lock and Heat Sink. Acuva Solarix is already a popular device in Canada, the US, and European markets and is now available in India through IRIS Global. Acuva Solarix comes with certification, warranty, and performance from a Technology leader.
