Iris Global partners with Garini, ventures into cybersecurity space in India

By VARINDIA 2018-03-01

Iris Global Services has tied up with Singapore-based Garini Technologies Corporation, a futuristic Science & Technology Company.

According to Iris Global Services CEO Himanshu Chawla, "We are now looking at the multibillion-dollar cybersecurity industry in India which is fairly untapped."

The entire economy going digital in a big way in India has also brought its flip side in the form of increase in cyber attacks.

Government, industries and businesses, whether big or small, have all become highly vulnerable to cyber attacks. Cybercrimes have increased manifold. It is estimated that cybercrime damage cost will hit \$6 trillion annually by 2021.

Odisha Information Technology Fair 2018

29th (Monday), January 2018, Hotel Mayfair-Lagoon, Bhubaneswar

Government, industries and businesses, whether big or small, have all become highly vulnerable to cyber attacks. Cybercrimes have increased manifold. It is estimated that cybercrime damage cost will hit \$6 trillion annually by 2021 and cybersecurity spending will touch \$1 trillion by 2021.

Protecting data and seeing that data is not compromised at any stage has become paramount as all processes are moving to becoming online. Today, cybersecurity is the fundamental need for any enterprise-based online.

Iris Global wants to bring to India GTC's products and solutions in cybersecurity for industries, governments, corporations, SMEs, which will tantamount to covering all aspects of businesses starting from endpoint computing, server storage on-premise and on cloud and SCADA-based systems all across in select verticals.

Chawla said, "We would be testing vulnerability of the enterprise, whether government, large company, industry, or medium and small enterprise. Thereafter, we will provide a full-fledged Risk Mitigation Plan and the technologies which will be best suited and tailor-made for the specific requirements of the enterprise."

He said they would be making available highly reliable products and services for the entire ecosystem providing comprehensive cybersecurity solutions to larger infrastructures like smart cities, airports, large industries, manufacturing bases and sensitive installations like DRDO, ISRO and BARC.

Iris Global partners with Garini, ventures into cybersecurity space in India

By VARINDIA 2018-03-19

Iris Global Services has tied up with Singapore-based Garini Technologies Corporation, a futuristic Science & Technology Company.

According to Iris Global Services CEO Himanshu Chawla, "We are now looking at the multibillion-dollar cybersecurity industry in India which is fairly untapped."

The entire economy going digital in a big way in India has also brought its flip side in the form of increase in cyber attacks.

Government, industries and businesses, whether big or small, have all become highly vulnerable to cyber attacks.

An advertisement for the Dell Latitude 7290 2-in-1 laptop. It features a purple background with a photo of the laptop. Text includes 'Latitude 7290 2-in-1', 'DELL LATITUDE THE NEW LOOK OF PRODUCTIVITY', 'Powered by 8th Gen Intel® Core™ Processors.', and 'Learn More'. At the bottom, it shows Intel Core i5 and i7 processor boxes.

A graphic titled 'VARINDIA CONGRATULATES THE EMINENT CIOs OF INDIA'. It features a grid of 18 small portraits of men, each with a name and title below it. The background is orange and blue.

According to Iris Global Services CEO Himanshu Chawla, "We are now looking at the multibillion-dollar cybersecurity industry in India which is fairly untapped."
